

## PRESS RELEASE

Berlin/Scherpenzeel, 22. of Sept. 2011

### 3DLES and virtyou join forces

**German virtyou GmbH and Dutch 3DLES (3D Learning Experiences Services) join forces to provide a stable 3D environment for education and architecture in Europe.**

Today we are happy to announce our collaboration with 3DLES, Netherlands. Nick Zwart, the founder of 3DLES has studied music, ICT and religion at Fontys University, NL. He's a specialist and teacher in the subject *New media in Religious Education* and has been among Europe's early adopters of Teen Second Life™ back in 2005. With the beginning of Opensimulator being a suitable platform for E-Learning, Nick Zwart has also become a well known specialist for Sloodle, a popular 3D E-learning System.

With the fabulous content creation and support of 3DLES, virtyou GmbH are currently hosting more than 25 regions with educational and community content.

virtyou GmbH provides premium Opensimulator regions for Educators for a special price. We are running servers in two European data centers, and can provide you with Relocation Services for your previous content, Inhouse Hosting Solutions and Virtual Servers upon request.

Every educational region will have his own set of Sloodle tools. A choice of selected freebie and virtyou specific objects like buildings, furniture, plants, clothing, translators, media players and full avatars will be provided with each region order.

If you haven't yet, create a free account for the virtyou Grid, explore our grid, meet us at our in-world office hours.

Looking forward to see you in-world:
